PROFILE

Journalist, analyst and entrepreneur. Having presented the Journal Parlé, the station's news bulletins, I now focus on my programmes, Africa Tech, Nzamba and Umuzi, on Ifrikya FM, Algeria's pan-African public radio, where I document and decode the continent's digital, economic and linguistic transformations. Alongside this, I am founding and building LOBAKA, voice infrastructure for a multilingual world: LOBAKA Sasa, live multilingual audio on everyone's own phone. I am also a co-founder of Sunnubang, a pan-African music collective born in Algiers. Trained in cybersecurity and networks (Master's in progress, RNCP level 7), I draw on genuine technical expertise to cover African tech news accurately rather than through second-hand simplification. Bilingual French/English.

EXPERIENCE

Presenter · Host · Columnist — Ifrikya FM, Algiers Since January 2024

- **Africa Tech** (created and hosted, since November 2023) — weekly programme on African technology and innovation, country by country; 29 episodes documented to date, season 2 launched in September 2026.
- **Nzamba** (host, since September 2026) — weekly magazine on the African startup ecosystem and entrepreneurship.
- **Umuzi** (host, since September 2026) — programme devoted to African languages.
- **Journal Parlé** (from 2025, role now ended) — preparing and presenting the news bulletins: the 2pm Flash, then the 6.45pm main bulletin.
- Columnist on **Éco Afrique** — analysis of the continent's economy.
- Format design, programme production and cultural columns.

Founder — LOBAKA, Algiers Since 2026

- **LOBAKA Sasa** — real-time multilingual audio for venues and events: the organiser creates a session and its channels and projects a QR code; each listener picks a channel on their own phone, in the browser, with no app. First pilot sessions in preparation.
- Test phase: free pilot sessions, validating use cases, feedback from organisers, speakers and listeners; up to 5 channels and 150 listeners per session at the first milestone.

Co-founder — Sunnubang, Algiers

- Pan-African music collective born in Algiers.

Internships — Cybersecurity, networks & systems 2023 – 2024

- **INSIM, Boumerdès** (Jan. – Sept. 2024) — PXE server on Rocky Linux 8 with Kickstart, segmentation of user spaces, automation with Ansible.
- **CRSIC, University of Boumerdès** (Oct. – Nov. 2023) — Sophos XG firewall, Active Directory on Windows Server 2022, LDAP authentication through a captive portal.

- **GICA CETIM, Boumerdès** (July – Aug. 2023) — pfSense firewall, centralised LDAP authentication, filtering and bandwidth control.
- **SONELGAZ, Boumerdès** (June – Aug. 2023) — redundant file-sharing and NFS server on Windows Server 2012, system restore points.
- **ANEJ** (Oct. – Dec. 2024) — welcoming and guiding refugees, helping to run entrepreneurship classes.

CONFERENCES

16th World Tourism Marketing Days 2024

- Talk on the role of digital technology in developing tourism in Africa; media coverage by Ifrikya FM and an article in L'Expression.

EDUCATION

Master's in Cybersecurity — HIMI Business School, Algiers Dec. 2025 – June 2027 (in progress)
French RNCP level 7 qualification (five years of higher education). Infrastructure protection and security auditing, as a work-study programme.

Bachelor's in IT Security — HIMI, Boumerdès Dec. 2023 – May 2025
French RNCP level 6 qualification. Networking and development fundamentals, then specialisation in data protection.

AEC — Network Management (Canadian programme) — HIMI, Boumerdès Mar. 2022 – Sept. 2024
Design, configuration, management and security of computer networks.

CERTIFICATIONS

CCNAv7 — Introduction to Networks · Switching, Routing & Wireless Essentials · Enterprise Networking, Security & Automation (Cisco) — AWS Cloud Solutions Architect (Coursera) — Introduction to Cyber Security Specialization (Coursera) — AI For Everyone (DeepLearning.AI, Coursera)
